

ADDLIGHT™ & EVERGLOW® EXIT Stairwell Markings

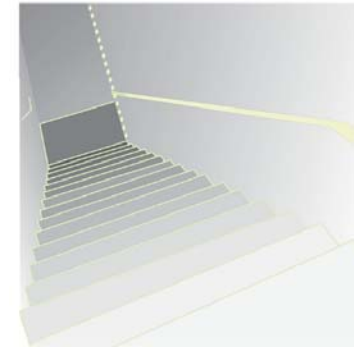

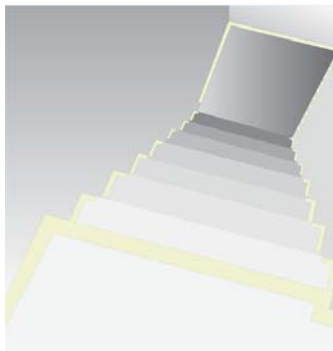

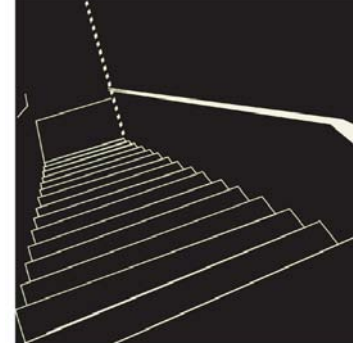

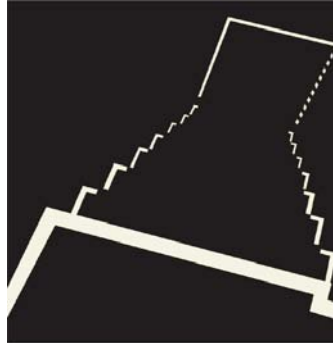

Aluminum Signs & Markings - All Meet NYC LL 26 - MEA Labeled

Premium Quality AddLight & EverGlow® Safety Guidance Systems

Exit path visibility in power outages is a must for occupant safety. New York City now mandates photoluminescent markings in stairwells of commercial high-rise office buildings. NYC code details the City's chosen design of a low location marking system for fire stairs.

The main points are:

- Mark all stair treads with front edge marking or side L's
- Mark entire floor perimeter of landings including front edge of landings leading to stairs
- Mark handrails
- Mark perimeter of EXIT path doors
- Add signage for all EXIT doors within the EXIT path
- Signage at change of direction or special direction, i.e., lateral transfers or up from basements or similar direction changes
- Mark obstacles protruding 4" or more into the stair to a height of 80"; low beams, low pipes, change of ceiling height, utility boxes, valves, pipes, etc.

ALL PRODUCTS

Premium STAYPUT™ GLOW TAPE

Works where others won't. Unique construction. Cast paint film technology with adhesive back for shrink free performance. Tough film with soft hand conforms to surfaces. Excellent for marking stairs, pathways, handrails, and fixed or movable hazards. Clean surface and install.

- Permanent
- Non-Shrink
- Conformable
- Non-Curl
- Peel & Stick Paint on a Roll
- NOT for Temporary Marking

Unique SP™ Tape Construction

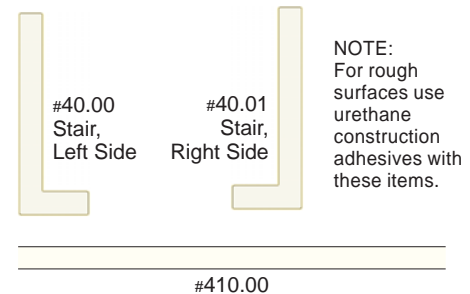

All Items are Self-Adhesive Peel and Stick Back.

Aluminum MARKINGS

ADDLIGHT™ & EVERGLOW® EXIT Stairwell Markings

Aluminum Signs & Markings - All Meet NYC LL 26 - MEA Labeled

Premium materials offer true value with a history of long service life; vinyl free products; select adhesive systems; and market leading innovations such as printed aluminum signs and StayPut™ films. In the real world, AddLight™ & EverGlow® products stand out.

MEA approved products are identified by their MEA number. This signifies that the material passes tests for flame spread brightness, washability, radioactivity, and toxicity. An MEA is not a measure of adhesives, service life, quality, or product construction. The AddLight™ & EverGlow® name assures those attributes.

All Signs are Aluminum with Self-Adhesive Peel and Stick Back.
